FOX THERMAL NAMUR NE 43 STATEMENT

The purpose of the NAMUR NE 43 function is to indicate alarm conditions on flow meters. During normal operation, the flow meter output uses the 4-20mA range for transmitting measurement information. During an alarm condition, the output transmits a ≤ 3.6 mA or ≥ 21 mA signal to report failures. Switching the NAMUR NE 43 function on or off is selectable by the user in the field.

For more information about NAMUR, please visit <https://www.namur.net/en/home.html>

For more information on alarms used by Fox Thermal flow meters, please refer to the instruction manual.

Sincerely,

Rich Cada
VP Sales & Marketing
