

Flow Control Innovation Awards

VOTE NOW!!

Dear Valued Fox Customer:

Fox Thermal Instruments has been nominated to receive the 2009 Flow Control Innovation Award. In order to win, we need YOUR VOTE!

Please click on the "VOTE NOW" link in order to vote and get registered for your chance to win an Apple iPhone 3G.

Thank you in advance for your support!

VOTE to WIN an iPhone 3G

When placing your votes for the 2009 Flow Control Innovation Awards, you will have the opportunity to automatically enter a random drawing to win a \$199 Apple iPhone 3G gift card. The gift card covers the current retail price of an 8GB iPhone 3G, or you can use it for any other product in the Apple online Store or any Apple Retail Store. The iPhone 3G features GPS, support for Microsoft Exchange ActiveSync, and the new App Store. And just like the original iPhone, it combines a cell phone, a widescreen iPod, and an Internet device into a single sleek handheld. [VOTE NOW !!](#)

FT2 Flow Meter and FT2 View™ Software

Fox Thermal Instruments' Model FT2 provides smart, real-time measurement of flow and temperature and supports a range of communication protocols, including RS422/RS485-Modbus, Profibus DP, DeviceNet and Ethernet.

FT2 View Software allows users to change meter configuration, collect process data or view measurements from a PC or control station.

Testimonial

"We use the Fox Model FT2 flowmeter with Modbus communications for measuring our industrial gases. I recently found myself in some 'soup' due to the gross inaccuracies we were experiencing with two other manufacturer's flowmeters. Although I had sent the other meters back to the factory for repair and recalibration, they were never able to achieve the measurement accuracy we require for our processes and services. With an urgent need to get it right and get it done quickly, I installed a Fox FT2 flowmeter and all of our problems went away, period. Now when we have a high-performance application, we turn to Fox for its precision instruments and flow expertise."

- Scott Terdic, Program Manager, U.S. Air Liquide
